PROFESSIONAL SUMMARY

Business Analyst with 6+ years of experience at Synfinii (formerly SalesPage Technologies) working with asset management data, CRM integrations, and internal tooling. I work across the gap between client teams and engineering—writing technical specs, untangling messy institutional data feeds, and building Python, SQL, Rust, and React tools when off-the-shelf workflows fall short.

SKILLS

- **Languages:** SQL (PostgreSQL, SQL Server, DuckDB), Python (Pandas, NumPy, FastAPI, Django), Rust (PyO3), TypeScript, React, HTML/CSS.
- **Tools & Platforms:** Salesforce CRM, Google Cloud Platform (GCP), Apache Airflow, Alteryx, Docker, Git/GitHub.
- **Domain & Analysis:** Technical Requirements (PRDs & User Stories), Master Data Management (MDM), Entity Resolution, Asset Management Distribution Data (Discovery Data, FinTrx, AdvizorPro, SEC Form ADV/13F, FINRA BrokerCheck), Client Onboarding.

PROFESSIONAL EXPERIENCE

Synfinii (formerly SalesPage Technologies) | Kalamazoo, MI

Business Analyst | *October 2025 – Present*

- **Sightseer (Product Owner):** Built and deployed an internal Python and SQL monitoring tool that tracks data pipeline failures and runs automated impact analysis so the team knows which client feeds need attention first.
- **Delivery Standards:** Defined Synfinii's technical delivery service standards, giving new analysts and engineers a clear playbook for onboarding and implementation.
- **AI Tooling:** Piloting practical LLM and MCP workflows for internal research, requirement drafting, and complex client data investigations.

SalesPage Technologies | Kalamazoo, MI

Solutions Analyst | *January 2023 – November 2025*

- **Feature Specifications:** Wrote technical specs for 50+ platform features, working directly with developers to cut back-and-forth during sprints and speed up delivery.
- **Third-Party Data Feeds:** Partnered with asset management clients to onboard and match **Discovery Data, FinTrx, and AdvizorPro** firm and rep data into their distribution workflows.
- **Client Migrations:** Moved 3 major institutional clients off legacy feeds onto modern data sources, automating manual tracking steps and cutting recurring operational work by **89%**.
- **Data Audits:** Ran technical audits on client sales and marketing data pipelines, fixing matching and reporting gaps across key accounts.

Associate Solution Analyst | *January 2020 – January 2023*

- **Nuveen Upgrade:** Led the technical scoping and requirements for Nuveen's platform upgrade and custom Salesforce CRM integration.
- **Client Training & Onboarding:** Onboarded institutional clients onto the SalesPage Enterprise Platform and trained user teams on data quality and day-to-day workflows.
- **Service Rollouts:** Implemented LumaSuite, Advisor Atlas, and SalesPage Resolution Services for new and existing accounts.

Western Michigan University | Kalamazoo, MI

Undergraduate Research Assistant | *2017 – 2019*

- **Accelerator Lab:** Operated the university's particle accelerator, maintained vacuum and beamline hardware, and troubleshot equipment issues during experimental runs.
- **Materials Research:** Programmed high-temperature furnaces and grew Lead Sulfide crystals for superconductivity experiments.

PROJECTS

- **Canonic MDM (Firm Association Platform):** Built a Master Data Management platform (**PostgreSQL, Django, React, Airflow**) that pulls public SEC, FINRA BrokerCheck, DTCC/NSCC, and GLEIF filings to match and classify **57,000+ financial firms** and **699,000+ licensed reps**.
- **Entity Standardizer:** Open-source Python and Rust (**PyO3**) library for cleaning, cross-healing, and deduplicating company names, people, physical addresses, and phone numbers without paid third-party APIs. GitHub
- **Query Builder:** Python SQL compiler and React visual query builder that lets users explore tables and build multi-dialect queries safely without writing raw SQL. GitHub
- **Data Quality Check Platform:** Built an automated SQL and Python validation tool on GCP to check 50+ business rules across 5 client databases, catching bad data before it hit production.
- **Hobby Habit:** Personal web app built with **Django, PostgreSQL, and Docker** for tracking shared hobby goals and milestones with friends. Visit Site

EDUCATION & CERTIFICATIONS

- **B.S. in Physics & B.S. in Applied Mathematics** | Western Michigan University, Kalamazoo, MI (April 2019)
- **Certifications:** Gen AI: Navigate the Landscape, Introduction to AI, Client Needs and Software Requirements.
